*Parrsboro.*—On the W. side of the entrance to Parrsboro' River—a fixed white light, 30 feet above high water, visible 9 miles. Octagonal white tower. standing close to high water mark on the beach.

*Horton Bluff.*—A white fixed light, 95 feet above high water level (rise and fall 4) to 45 ft.), visible in clear weather over the greater part of the Basin of Minas (after passing Cape Blomedon) and above the Five Islands and up to Windsor River, until intercepted by the continuation of the Bluff to the southward of it. Square white building, standing 60 feet from the Bluff.

*Burnt Coat Head.*—The lantern is erected on a square tower attached to the main building. A white fixed light, 75 feet above high water level, and visible from all points of approach.

*Gannet Rock Light.*—This light is intended to warn vessels of their approach to a very dangerous range of shoals and ledges, which extend from the Old Proprietor to the Seal Islands, off Machias, a distance of about twenty miles. It is a light of the Fourth order, Holographal system—fixed white light 45 seconds, eclipse  $5\frac{1}{2}$ , flash  $5\frac{1}{2}$ , eclipse  $5\frac{1}{2}$ . The Light House is painted in stripes, vertical, black and white. A gun is fired to answer signals during a fog. Dangerous rocks extend four miles eastward of the Lighthouse.

*Bearings and Distance by Compass from the Gannet Rock Light House.* This Light bears from the Light House on Brier Island, N. N. W.  $\frac{1}{4}$  W, 22 miles.

From the Gannet Rock to Machias Seal Island, W. and by N.,  $\frac{1}{4}$  N., 12 miles.

*NOTE.*—Between the Northernmost and Southernmost of the Murr Ledges, there is a range of dangerous rocks and shoals, many of them always above water, and which extends Westward from the Light House about four miles; from this range, farther Westward, about six miles from the Gannet Light, lies a dangerous breaker, called the Bull. This may be avoided by keeping three remarkable headlands near the S. W. end of Grand Manan, open.

From Brier Island Light to the Old Proprietor, N. and by W.  $\frac{1}{4}$  W.,  $18\frac{1}{2}$  miles.

Both the buildings are painted white. A fog whistle has been erected on the island, which will be sounded as follows each minute:—Two blasts of five seconds in each minute, with an interval of 25 seconds between each blast. The following are the bearings from them, viz.:

Vessels standing to the Northward, between these Lights and the Gannet Rock, should tack or haul off the moment they bring these Lights in one, as they will not then be more than three-fourths of a mile from the Murr Ledges, if more than five miles to the East of the Lights.

[It is recommended that the Ships' Compasses should be well compared and adjusted particularly in new ships, before they leave Partridge Island, as serious errors have frequently occurred from want of attention on this point; and as the variation in the Bay of Fundy is seventeen degrees Westerly, (or  $1\frac{1}{2}$  points), it will be found by the latest published Admiralty Charts, that the course from Partridge Island down the Bay, South Channel, between the Old Proprietor and N. W. Ledge, is S. W.  $\frac{1}{4}$  S.; but the course to be steered must depend on the direction of the wind on leaving Partridge Island.]

**Head Harbour Light.**—Next in order, after passing Grand Manan and the plain white Light (American), on West Quoddy Point, is Head Harbour Light. This is placed on the North East extremity of Campobello, and is a guide to vessels entering the main channel to West Isles, Moose Island, and the inner Bay of Passamaquoddy; it enables vessels also at all times to enter Head Harbour—it is a fixed *white* light. The building is painted white, with a red cross on it.

**Point Le Preaux Lights.**—Upon this projecting head land, two lights are placed, one above the other, in the same house, and distant 28 feet. Both lights can be seen from every point of the compass, they where may be useful—both are fixed, and *white*. The Light House is painted red and white, in stripes of five feet broad each, horizontally.

A Steam Fog Alarm has been placed in this Station, which will sound twice in each minute.

The Steam Whistle on this Island is sounded ten seconds in every minute during foggy or thick weather.

*Beacon Light.*—Within Partridge Island, and upon a Spit or Bar, which extends about half a mile S. S. E. off Sand Point, and which dries at two-thirds ebb, stands the Beacon Tower. Upon this Tower a Fourth Order Dioptric Light, visible ten miles, is established, which is eminently useful to the coasting trade of Saint John, and to all other vessels having pilots on board, as it enables them to enter the harbour at all hours of the night. A fixed *white* light. The house is white and black, in stripes vertically.

*Quaco.*—A revolving *white* light is placed on a small rock off Quaco Head, showing twice full and twice dark in a minute. This light can be seen from any quarter where a vessel can approach. The Light House is painted white and red, in horizontal stripes.

The Lighthouse is a square, white building, with a Tower erected on it, and is 27 feet in height from base to the centre of the Light, and 35 feet from base to the top of the Lantern. The illuminating apparatus is Catoptric. The Light will be visible between the bearings from E. S. E., round by South to W. N. W.—The Light will serve as a guide for vessels entering Saint John Harbour, Partridge Island Light bearing by Compass N. W. by W. half W. Northerly, the distance being 8 ¼ miles from Light to Light.

*Cape Enrage Light.*—On the Point of that name, in Westmorland, nearly opposite Apple River Harbour, N. S. A plain *white* light. The house is painted white, and is about 120 feet above tide mark. Light visible 18 miles. The Steam Whistle is 150 feet north-east of the Light House, and is sounded during thick weather, fog and snow storms, for eight seconds in each minute, with an interval of fifty-two seconds between each blast. The Whistle is heard in calm weather or with the wind at a distance of ten miles, and in stormy weather or against the wind from three to five miles, according to the state of the atmosphere.

*West Quoddy Light.*—This is an American Light, and is placed on the West side of the entrance into the St. Croix by Lubec and Eastport.

## Time for going through the Falls.

The Falls are level or still water at about three and a half hours on the flood, and about two and a half on the ebb, so that they are passable four times in twenty-four hours, about ten or fifteen minutes each time. No other rule can be given, as much depends on the floods in the River Saint John, and time of high water or full sea, which is often hastened by high winds, and in proportion to the height of them.

**TO PURIFY RIVER OR MUDDY WATER.**—In a quart of warm water dissolve an ounce of alum, and stir it about in the proportion of a teacupful to each gallon. The impurities present will settle at the bottom, and the water will in the course of a day be quite clear.

**TO DRIVE FLIES FROM A ROOM.**—Mix with half a teacupful of milk a tablespoonful of finely ground black pepper, and the same quantity of vinegar. Put this about the places where the flies are most numerous.

### Table for Foretelling the Weather through all the Lunations of each Year.

This Table, and the accompanying remarks, are the result of many years actual observation; the whole being constructed on a due consideration of the attraction of the Sun and Moon, in their several positions respecting the Earth, and will, by simple inspection, show the observer what kind of weather will most probably follow the entrance of the Moon into any of its quarters, and that so near the truth as to be seldom found to fail.

If the new moon, the first quarter, the full moon, or the last quarter happens	IN SUMMER.	IN WINTER.
Between midnight and 2 in the morning.	Fair.	Hard frost, unless the wind be S. or W.
— 2 and 4 morning.	Cold, frequent showers.	Snow and stormy.
— 4 and 6 “	Rain.	Rain.
— 6 and 8 “	Wind and rain.	Stormy.
— 8 and 10 “	Changeable.	Cold rain, if wind be W., Snow if E.
— 10 and 12 “	Frequent showers.	Cold and high wind
At 12 noon, and 2 P. M.	Very rainy.	Snow or rain.
Between 2 and 4 P. M.	Changeable.	Fair and mild.
— 4 and 6 P. M.	Fair.	Fair.
— 6 and 8 “	Fair, if wind N. W.	Fair and frosty, if wind N. or N. E.
	Rainy, if S. or S. W.	Rain or snow, if S. S. W.
— 8 and 10 “	Ditto.	Ditto.
— 10 and midnight.	Fair.	Fair and frosty.

*Observations.*—The nearer the time of the Moon's change to noon or midnight, the more nearly will the result accord with the prediction.

The space for this calculation occupies from ten at night till two next morning.

The moon's charge, first quarter, full and last quarter, happening during six of the afternoon hours, i. e., from four to ten, may be followed by fair weather; but this is mostly dependent on the wind, as is noted in the table.

# The Time Ball, on top of the Custom House Building, St. John, N. B.,

Will be hoisted half its elevation each day (Sundays excepted) at fifteen minutes before 1 o'clock. At one minute before 1 o'clock it will be hoisted its full height; and at 1 o'clock, mean time, the Ball will be dropped. A Chronometer keeping correct Greenwich time, should then shew 5h. 24m. 15s., and the difference between this and the time shewn by a Chronometer, is its true error on Greenwich time at the moment. As the above hour of 1 o'clock, when the Ball drops, represents 5h. 24m. 15s. at Greenwich, the error of a Chronometer may be ascertained, no matter where the Ship is lying. Masters of vessels arriving at Saint John, should compare their Chronometers by the Time Ball, as it will enable them to get the searate, which frequently varies from harbor rates. Latitude 45d. 16m. 42s. N. Longitude 4h. 24m. 15s. West.

**SOAKING SEED WHEAT IN BRINE.**—Having cleaned your seed, prepare a pickle of salt dissolved in water, sufficiently strong to bear up a potato, and for half a barrel of such pickle add half a pound of blue vitriol. When all is dissolved put in the seed, stir it well, and skim off all that rises to the surface; throw the remainder into a basket to drain; let this be done ten or twelve hours previous to sowing. Just before sowing spread it on a tight floor and roll in slaked lime to a powder, stirring it well with rakes. It is now ready to deposit in the soil. The 1st of September is as late as the seed ought to be sown, and in no case ought it to be delayed later than the 10th of the month. As the kernels of different varieties vary in size, some will require a larger quantity than others; so, also, if sown broadcast by hand or drilled by machine, the former will require more seed than the latter. From five pecks to two bushels, and in some instances, more, are used, varying with the mode of sowing, and with different cultivators. The grain drill, pro-

perly adjusted, deposits the seed more uniformly, covers it at an even depth, requires less seed, and usually give greater crops than when sown by hand; also, the work is done quicker, the seed comes up more uniformly, and is better prepared to resist any counteracting influences. Where seed is sown by hand it should be evenly distributed, and the harrowing should be both length and crossways the field, to cover the seed as uniformly as possible.

**PASTE THIS IN YOUR HAT.**—Here are a few items of information known to some, but to a great many yet to be learned: How to lay off a square acre of ground: Measure off 208½ feet on each side and you will have an acre within an inch. Contents of distances: An acre contains 4,840 square yards. Measure of distances: A mile is 5,280 feet, or 1,760 yards in length. A fathom is six feet. A league is six miles. A day's journey is 33½ miles. A cubit is two feet. A hand (horse measure) is four inches. A palm is three inches. A span is 10½ inches. A snace is three feet. A barrel of flour weighs 196 pounds. A barrel of pork is 200 pounds. A barrel of rice is 200 pounds. A barrel of powder is 25 pounds. A firkin of butter is 56 pounds. The following are sold by weight per bushel: Wheat, beans, and clover seed, 60 pounds to the bushel; corn, rye, and flaxseed, 56 pounds to the bushel.

**A SUGGESTION AS TO THE MANAGEMENT OF SMALL POX.**—When a case occurs in a family, as soon as it is ascertained to be small pox, remove every article of furniture, carpeting, and ornaments from the room to some out-of-the-way room, attic, shed, or barn; have nothing in the room except such things as are indispensable for the use of the patient. Now dissolve a small quantity of chloride of lime in hot water, strain it into a tub of water, and set it in the room. When you change the linen of the patient, or sheets and bedding (which should be done often in bad cases), put all into this tub of chloromated water, until enough is accumulated to make a washing, and thus all contagion will be destroyed. Keep a good circulation of air in the room; keep the patient cool but not cold. If the case be a mild one, very little medicine is required; with a light, nourishing diet all will end well in from seventeen to twenty-one days. In more violent cases a more careful attention is required, and a skilful physician's attendance is important.

The manner of cleansing the patient is of the utmost importance for the public security. After every scale of the dried eruption is removed from the body, hands, feet, and nails, put the patient in a tub of warm water, with a little of the chloride of lime, and with a comb be careful to remove all scabs from the head; soap the hair well, and wash the whole person down, wipe d.y, and put on clean clothes, and the patient is free from contagion. If the patient is allowed to go among the people without a thorough cleansing, every flake removed from the thick skin of the feet will carry contagion with it.

All farm machinery should receive two good coats of paint whenever it has been sufficiently exposed to cause the paint to scale off and lose its glossy appearance. A few quarts of paint will go a long way in protecting machinery during the exposed period; and there is no doubt that when unprotected by paint when in use and by shelter when not in use more injury is done than by ordinary wear.

 **SAFE AND SURE.** 

# GRAHAM'S PAIN ERADICATOR

has stood the test of several years, having been placed before the public in 1869, and its extraordinary curative powers had been long tested previously. It is everywhere acknowledged to be the best and most successful remedy for

## **RHEUMATISM, NEURALGIA, ASTHMA, AND OTHER CHRONIC COMPLAINTS,**

Which it cures effectually, and is equally efficacious for the cure of

**CUTS, BURNS, SCALDS, BRUISES, SPRAINS,**  
And most forms of Aches and Pains.

## **DIPHTHERIA, QUINSY,**

And other forms of SORE THROAT are readily cured by it.

As it does not smart or cause any unpleasant sensation, children use it readily. It is also the safest and best remedy for CROUP, and is excellent for COUGHS and COLDS. A few drops will cure EAR ACHE and the buzzing sound or noise in the head that renders people partially deaf.

## **NEURALGIA AND NERVOUS HEADACHE**

Are readily cured by it.

**For Lame Back, Lumbago, Sciatica, and Pains in the Side and Breast,**

## **RHEUMATISM,**

no matter how long standing, may be cured by following the directions accompanying each bottle. Hundreds have been cured by it, many of whom have been afflicted for from twenty to thirty years; in many cases the cures have been effected by the use of one or two bottles.

 It is the cheapest as well as the best; five drops will cover a surface as large as the hand, and it does not waste by evaporation as do those composed of Alcohol, Ether, Ammonia, &c.

The PAIN ERADICATOR does not contain any Opium, Ether, Chloroform, or other dangerous narcotic or mineral substance to destroy the sensibility of the nerves, and only render the sufferer insensible to pain, neither does it contain any Cayenne, Pepper, Potash, or Ammonia, to burn or blister; but it is a purely VEGETABLE, SOOTHING, HEALING, BALSAMIC MAGNETIC OIL, that acts on chemical and electrical principles, it quickly permeates the tissues, acts directly on the absorbents, equalizes the circulation, reduces inflammation, glandular, and other swellings, and gives freedom from pain by allaying nervous irritation, removing the disease, and restoring a healthy action to the system.
